

Novax - Model 401 C-D-P-R-S Signal Bracket Assembly

Pelco Products

The **Model 401 C-D-P-R-S** from Pelco is a robust and versatile signal-mount assembly designed for the secure installation of traffic lights, cameras, and other signaling devices. Its durable cast-aluminum construction and compatibility with various pole types make it a reliable solution for both permanent and temporary installations.

Description

Benefits

- **Quick, secure installation** on multiple pole types
- **Precise adjustment** for optimal signal alignment
- **Durable design** suited for extreme road conditions
- **Versatile application** for lights, cameras, and detectors

Applications

- Urban and rural intersections
- Temporary or permanent signal installations
- ITS infrastructure projects

Specifications

Technical Specifications

- High-strength **cast-aluminum** assembly
- Corrosion-resistant finish for extended service life
- Compatible with poles from **2 3/8 in. (60 mm)** to **4 1/2 in. (114 mm)** in diameter
- Allows **precise horizontal and vertical adjustment** of the signal
- Available with **stainless-steel hardware** and **neoprene isolators**
- Meets **NEMA TS2** and **Caltrans** standards
