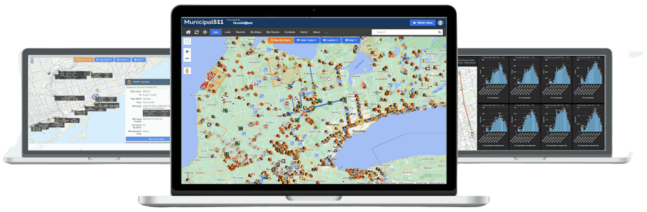
Permit Central – Digital Road Permit Management Platform



Transnomis Solutions

Permit Central is a cloud-based system that allows the public and contractors to apply for road-use permits online while giving municipal staff streamlined tools to review, approve, and coordinate permits efficiently.

Description

Key Features

- Map-based permit conflict detection
- Online application and approval workflows
- Integration with Municipal 511 for public communication
- Optional payment system integration
- Communication history and audit logging

Specifications

Benefits

- Prevent overlapping or conflicting road closures
- No more manually tracking permits by email or spreadsheet
- Faster approvals and fewer processing errors
- Reduced administrative workload

Use Cases

- Construction permits
- Oversize load routing
- Utility work and right-of-way access
- Event and filming permits
