Discover why Spinnaker can take you where you want to go!

We understand that efficiently managing your current and future traffic requires a solution that will deliver immediate benefits and is designed with the flexibility to help you achieve your immediate and long-term goals. As the traffic industry leader, Peek continues to offer advanced technology to help optimize your ITS solution and improve traffic management. Spinnaker is a true web based, user friendly, intuitive, scalable, and effective Advanced Traffic Management System (ATMS).

Spinnaker is the most advanced ATMS in the industry with an integration platform for multiple sub-systems. It is viewable through different operating systems and computing devices such as Windows, OSX, Android, iOS and Linux.
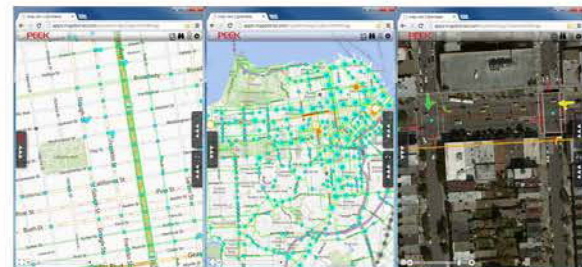

The Navigator, Explorer and Reporter modules are packed with features. Seamless scrolling and zooming of map displays, easy intersection configuration, device filtering, alarms, field device connection for monitoring and status, standard and customized reporting on all data to name a few.
